

Subject Report

Teacher: Julie Aspin

Subject: Geography

Date: 2.6.25

This year in Geography classes have been looking at different landscapes around where we live. Year 6 went to Pendle Hill to explore the environment and features of hilly landscapes. Another class went to Clitheroe castle to explore the landscape and environment surrounding the castle. Classes have looked at different features we can find in the different areas we live in. For example, would we find shops in a town or the countryside? What features would we find in a park? Some classes looked at maps and the symbols we would find on maps. They then created their own maps of familiar environments. Some classes have visited farms and the beach linked into topics on the scheme of work.

Moving forward the subject leader will be looking at resources that will further develop the learning of the children within our school such as suitable maps and big books giving information about geographical subjects. The subject leader will also examine the whole school scheme of work to ensure the topics are relevant to the learning needs of the children within that year group. Subject leader to look closely at suitability of topics and learning needs of children when completing learning walks which in turn will help with evaluation and development of scheme of work.
